

6. ACCIDENTAL RELEASE MEASURES:

Ventilate the working area. No smoking or naked lights. Shut down all possible sources of ignition. Soak up spills with sand or earth and dispose of in accordance with local regulations.

7. HANDLING AND STORAGE:

Suitable protective clothing including goggles and rubber or PVC gloves should be worn if handling large quantities of the preparation. Electrical earthing should be used if the preparation is transferred or poured. This is especially important where plastic vessels or tubing are employed.

The preparation should be stored in cool conditions, away from sources of heat or ignition, direct sunlight and incompatible substances (see 10 below). Store away from foodstuffs. Keep away from children.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION:

The preparation need not be considered to be an appreciable health hazard under normal conditions of use. If good ventilation exists in the workplace and the earthing precautions mentioned in 7 above are observed, no special protection is required for handling and using small quantities. Care should however be taken to avoid contact with the eyes and to avoid prolonged skin contact.

9. PHYSICAL AND CHEMICAL PROPERTIES:

| | |
|-----------------------------|---|
| Appearance | Mobile coloured (see 1(A)) liquid, packed in bottles |
| Odour | Characteristic sharp odour |
| pH | n/a |
| Boilingpoint/boiling range | 167°C |
| Melting point/melting range | ca 45°C |
| Flash point | 57°C minimum |
| Autoflammability | 600°C |
| Explosive properties | Vapour/air mixtures may be explosive at temperatures above flash point |
| Oxidising properties | None |
| Vapour pressure | 1.1mm Hg at 20°C |
| Relative density | ca 0.97g/cm ³ at 20°C |
| Solubility | Partly miscible with water. Fully miscible with lower alcohols and ketones. |
